

Lit by the booth LEDs

Colours sampled from the five studio photos (control room, vocal booth, mixing desk, mic close-up). The photos are about 26% pure black and nearly all of the rest is blue and violet between 240° and 260° hue, with small patches of red from the booth ceiling light.

HOW MUCH OF THE PHOTOS EACH COLOUR COVERS

Widths follow pixel counts from the photos. Warm reds are under 1%, so use them sparingly.
